BIBLE

The Plumbers **BIBLE**

THE TRADESMAN'S CHOICE

THE TRADESMAN'S CHOICE

IN THE BEGINNING THERE WAS MAN...

hen the **Wife** arrived and wanted a new place to live complete with all the mod cons including an ensuite, a powder room, toilet, bathroom with hot and cold running water, shower and spa, a kitchen with a plumbed in water filter, dishwasher, triple bowl sink and mixer tap, laundry with water saver washer, outside hot and cold tap to wash the dog, a swimming pool for when the kids arrive with an outdoor shower and some rainwater tanks and grey water recycling system and a reticulation watering system for the manicured gardens with a small water feature...

THE TRADESMAN'S CHOICE

THEN CAME THE PLUMBER

CONTENTS

This Plumbing Bible has been developed to assist plumbers in selecting and using a range of Abey plumbing products. Abey is a wholly Australian owned family company. Most Abey plumbing products are proudly Australian made to conform to Australian and New Zealand Building Standards and conditions. Other products in the Abey range have been sourced and selected from all over the world as being “best of breed”, providing plumbers the best world class solutions that help Save Time, Save Money or Save Space. Abey have been assisting plumbers for over 50 years by developing and manufacturing innovative and unique plumbing products, which is why Abey are ‘The Tradesman’s Choice’.

FIGHTING THE RUST DEMON

The scourge of the plumbing industry has to be the effects that corrosion has on plumbing products and materials. Pipe clips are prone to corrosion and unless correctly engineered and coated can break down and become a problem, especially in highly corrosive environment such as close to the sea. Welding is old and outdated technology. The weakest link can always be found in the weld. When it comes to clipping products, welding undermines the strength of the steel and is prone to corrosion. Abey's continual improvement program is developing products that fight the rust demon.

Abey understand this problem and are leading the way by phasing out welded products for good by developing and re-engineering their products.

Abey products are correctly coated and accurately machine pressed, offering 100% consistent quality, superior strength and are less prone to corrosion. AND importantly, they are a superior locally made products that cost around the same as inferior, cheap welded imports.

Abey have for over 50 years been the leading innovators in this field. Their products have helped lift standards and make plumbers' jobs a lot easier.

**STAMP
OUT THE
RUST DEMON**

FIGHTING THE RUST DEMON

Welding undermines the strength of the steel and is prone to corrosion.

Machine pressed clipping products provide a greater strength than welding and are less prone to corrosion.

Materials and coatings on most imported clips are often dubious and may not conform to AS/NZ building standards.

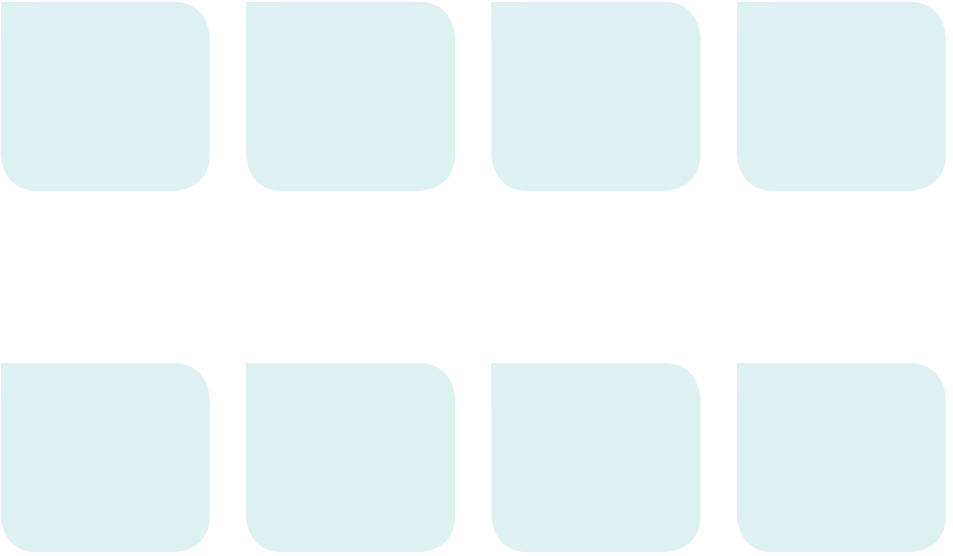

Manufactured and supported locally, Abey products conform to AS/NZ building codes.

When your cheap Chinese clip breaks down, who do you complain to? Abey provides full nation wide support.

Hi tensile zinc coated nuts and bolts are often included. Quality of materials and coatings guaranteed.

ABEY CLIPS

SADDLE CLIPPING RANGE

Abey have for over 50 years been 'The Tradesman's Choice' for quality plumbing products. A proud 100% family owned company, employing over 150 people locally, Abey's streamlined manufacturing facilities produce a huge range of precision engineered products for the building and plumbing industry, that are cost competitive against overseas imports.

INTERCHANGEABLE CLIPPING SYSTEM

Abey's 'interchangeable' bolted clipping system has endured the test of time. It has been engineered to the most stringent specifications and manufactured to suit all pipe sizes for domestic installations. Manufactured in Australia from G2-Z275 galvanised steel and further powder coated to colour match Copper, BSP, HDPE and DWV pipes as well as extra corrosion resistant stainless steel.

- ✓ The system provides a more streamlined and superior aesthetic finish
- ✓ Engineered to meet Australian and New Zealand building Codes
- ✓ Unique engineering feature creates a system of interchangeable Clips, Shanks and Brackets to minimise stock

All Clip Heads engineered to meet exact specifications to allow for expansion and contraction

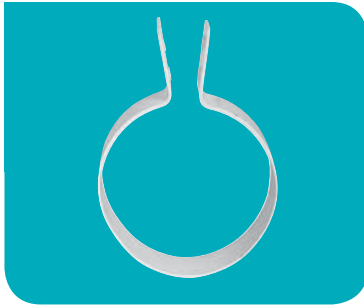

Notice the elongated recess and square hole. They are designed to ensure perfect alignment and eliminate movement

INTERCHANGEABLE CLIPPING SYSTEM SPACING OF BRACKETS & CLIPS

The following spacing limitations for horizontal and vertical piping are derived from AS 3500. It is to be noted that with fire sprinkler installations an additional bracket is required to support a sprinkler branch within 300mm of the sprinkler.

Sprinkler piping shall be supported from structural members and clips designed to withstand the anticipated stresses and loads. Piping shall be secured to restrict movement during its normal life and upon sprinkler operation.

Spacing of Brackets and Clips

INTERCHANGEABLE CLIPPING SYSTEM ENCAPSULATED NUT BRACKET

Abey's Encapsulated Nut Bracket has been designed for use with the Abey Interchangeable Clipping System for pipework from 10-250mm. For use in hanging situations, Abey have developed this product to replace the old style welded nut bracket as welding has traditionally been the weak point. This unique product reduces any potential for corrosion and weld failure. Easy to hang 10mm pipe for all thread applications. Hallelujah!

Unique construction eliminates welds which is where corrosion usually occurs.

Galvanised steel enclosure around hi-tensile zinc plated nut. Strength tested to 1500kg.

See instructional web video – www.abeytrade.com.au

Trim thread to length.

Secure all thread to masonry anchor point.

Screw Abey's encapsulated nut bracket onto all thread.

Fit pipe and secure lower section with bolts and nuts supplied.

ADJUSTABLE STAND OFF BRACKETS

Abey's Adjustable Stand Off Bracket is a very versatile tool that should be part of every plumber's kit. It comes in 2 parts and with a pair of pliers can easily be snapped off to any required length from 30-60mm. Then fit them off as you would a normal Stand Off Bracket. They can be used in uneven wall situations to provide a straight fitting point. They can also be used in underfloor situations to fit off pipes. Simply snap off to create the proper fall allowance.

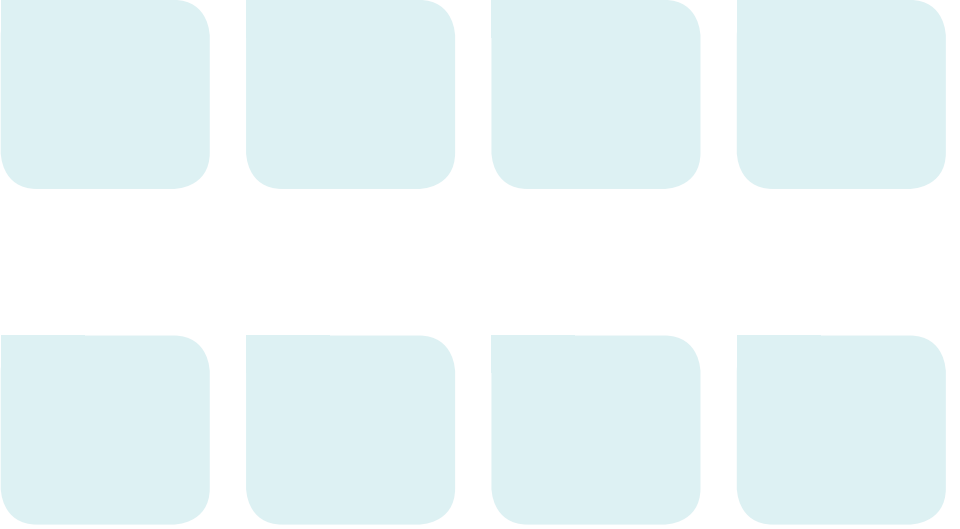

- AVAILABLE IN -
- POWDER COATED - WHITE
 - GALVANISED
 - STAINLESS STEEL

Abey's Adjustable Stand Off Bracket comes in two pieces. Simply measure the distance for the pipe to stand off the wall, and snap bracket to appropriate size.

INDUSTRIAL BOLTED CLIPPING STAND OFF CLIPS

Abey Industrial Stand Off Clips for PVC pipe, are a 2 piece clip manufactured without welds to eliminate the evils of corrosion for 40-150mm pipe sizes. They are easy to position and fit, even with existing pipework to provide a neater looking finished result.

*Designed without welds
to help prevent rust*

1. Two part clip for new and retro fit applications

2. Position bracket and fasten to wall

3. Place pipe into bracket base

4. Secure front of the brace with bolt & nuts (supplied)

5. Fasteners neatly hidden behind pipe

INDUSTRIAL BOLTED CLIPPING NUT CLIPS

The biggest difference plumbers may notice between the Abey product and imported clips is the welding. While both look similar, Abey's newest nut clips are no longer welded but machine pressed, which means they are stronger, more consistent better quality products, that fight the rust demons.

Imported products are often welded by hand making their quality inconsistent.

Abey's Industrial Nut clips – are machine pressed and are available for:

- ✓ DWV
- ✓ Gal and
- ✓ Copper
- ✓ HDPE pipe

For sizes ranging from 12 – 300mm diameter.

A powder coating is applied to the galvanised clip to give extra corrosion protection.

Abey's manufacturing facility showing the powder coating operation

INDUSTRIAL BOLTED CLIPPING STAND OFF BRACKETS

In line with Abey's continuous product improvement program they are currently phasing out and re-engineering their welded products due to the inherent weakness and corrosion issues associated with welding. Their new Stand Off Bracket is pressed, has no welds, is stronger and offers greater rust resistance and longevity than welded brackets, especially useful in moist and highly corrosive environments. Insist on Abey and avoid the risks of inferior imports.

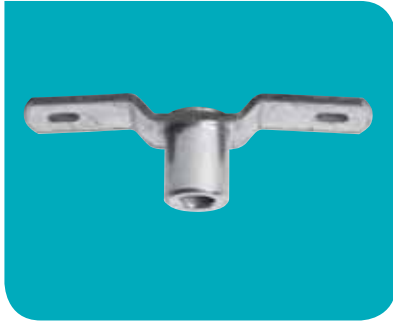

All Abey Nut Clip Stand Off brackets are pressed, 'Not Welded', providing superior strength and rust resistance.

INDUSTRIAL BOLTED CLIPPING ALL THREAD CLIPS

Abey industrial All Thread Clips are rated for industrial applications of up to 1500kg for PVC, & Gal pipe. There are no welds and they are galvanised and powder coated to eliminate corrosion potential and conform to AS/NZ building codes. They also offer a unique feature for adjustment of pipe fall.

1. Trim All Thread to required length. Measure and mark off fall line and screw the first locating nut above this position

2. Position bracket and swing lower section out of the way and fit pipe.

3. Secure the lower section with the hi-tensile, zinc plated bolts and nuts. (supplied)

4. Fit remaining pipe and make any minor pipe fall adjustments prior to tightening off.

INDUSTRIAL BOLTED CLIPPING ABEY SPEED CLIPS

Abey's miraculous SPEED Clips are a godsend. Invented, developed and manufactured locally, Abey SPEED Clips are the latest and greatest clipping product on the market today. These unique clips can reduce installation time by up to 50% and eliminate the fiddly, awkward and sometimes dangerous process of hanging heavy pipework while trying to fit fiddly nuts and bolts.

Abey SPEED Clips enable plumbers to hang pipework and make adjustments prior to tightening, reducing many installations to just a one man job.

Abey SPEED Clips come in 3 styles to suit most common pipes sizes:

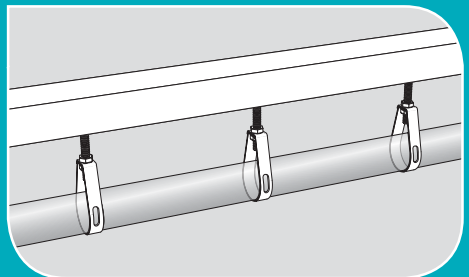

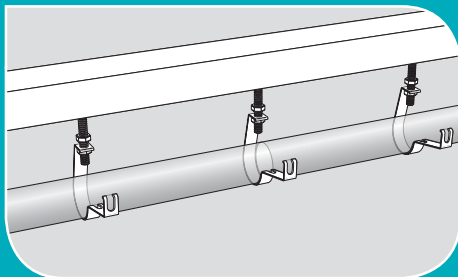

1. Speediest snap lock style SPEED Clip for pipes 20-65mm diameter, provides plumbers the fastest installation clipping system ever.

2. Heavy duty SPEED Clip for heavy bsp pipes 80 to 150mm in diameter.

3. And a larger snap lock clip for DWV pipes 100 to 250mm in diameter.

INDUSTRIAL BOLTED CLIPPING ABEY SPEED CLIPS

1. Measure off and fit bulldog fastenings.

2. Trim All Thread and secure to masonry anchor point.

3. Measure fall and spin on top nut approx 5mm above the measure.

4. Finish off row and simply hang pipe on bracket, SPEED Clip will hold pipe temporarily allowing final adjustment.

5. Then simply fold SPEED Clip arm upwards and 'snap' into place to lock shut.

6. Tighten top nut to secure.

“ SPEED Clips can actually support the pipe to allow adjustments to be made prior to tightening. Once pipework is correctly positioned you simply 'SNAP' lock the SPEED Clip and tighten the top nut, providing the fastest and easiest installation ever. ”

ABEY'S FANTASTIC PLASTIC AIR ADMITTANCE VALVES (VENTAPIPE)

Abey's Ventapipe Air Admittance Valves are for use in above ground drainage systems to enable ventilating pipes to be terminated within the building. Easier, faster installations are gained, negating the need for roof penetrations.

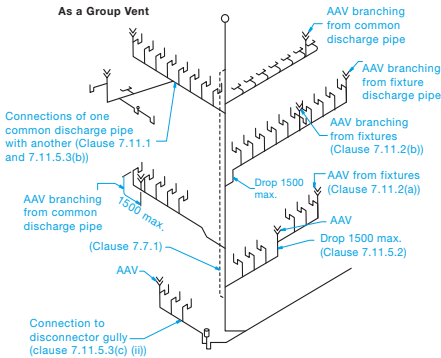

- ✓ Prevents the release of foul air
- ✓ Reduces risk of syphoning
- ✓ Can be used in most internal situations
- ✓ Used in both new and existing systems
- ✓ Allows for greater design flexibility
- ✓ Reduces material and labour costs
- ✓ Rigorously tested
- ✓ Will not unseal

ABEY'S FANTASTIC PLASTIC ALL-IN-ONE AAV SPEED TRAP

Abey's new S&P Speed Trap will save you time and money. By drawing air through the integrated AAV valve, the system neutralises syphonic pressure before it reaches the seal of the Trap. Therefore, it provides the equivalent of a ventilated system without the installation of costly and unsightly ventilation pipes.

- ✓ Prevents the release of foul air
- ✓ Reduces risk of syphoning
- ✓ Can be used in most internal situations
- ✓ Allows for greater design flexibility
- ✓ Used in both new and existing systems
- ✓ For single fixture unit only

PLASTIC PLUMBING

GOOD... DO IT THE HARD WAY

Traditional under-sink installations require ventilation to neutralise syphon pressure and prevent release of foul air, a cumbersome exercise requiring a secondary pipe vented externally...

BETTER... DO IT THE CONVENTIONAL WAY

Reduce extensive pipework by utilising an air admittance valve inside the cabinet. But fabricating pipework in confined spaces also wastes time, energy and cupboard space...

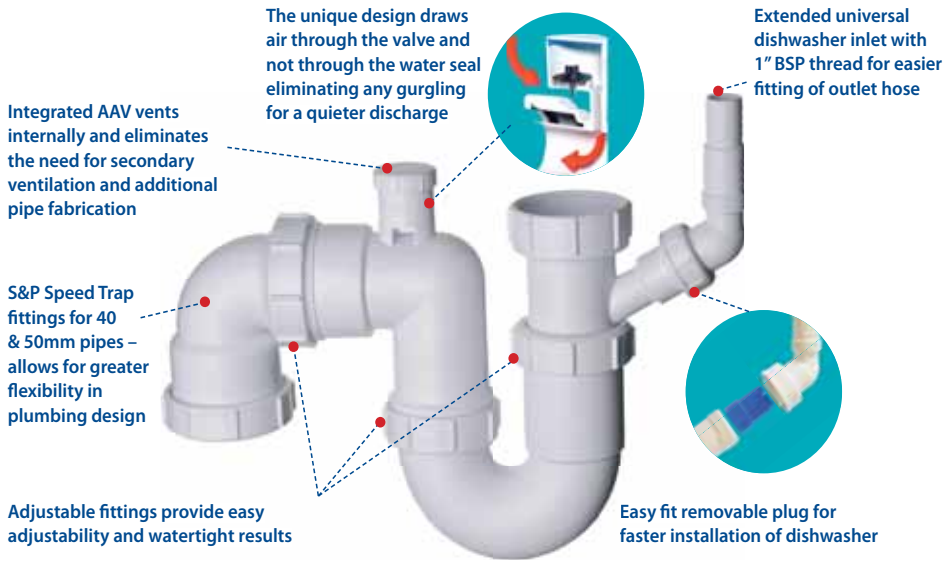

BEST... DO IT THE ABEY 'SPEED TRAP' WAY

Your time is money so don't waste it by fiddling around with unnecessary pipe fabrication work. Abey's NEW S&P Speed Trap with integrated AAV solves the problem once and for all. Simpler installation, Saves Time, Saves Space, Saves Materials and lets you get on with your job faster and easier than ever before.

ABEY'S FANTASTIC PLASTIC KITCHEN SPACE SAVER KITS

Make the most of under-sink cupboard space with Abey's fantastic plastic under-sink Space Savers. Finally you can solve that age old problem that has been plaguing mankind and regain that illusive space under the sink. Abey Under Sink Space Savers move ugly and cumbersome waste pipework to the back of the cupboard to gain valuable under-sink cupboard space once and for all – Hallelujah!

PLASTIC PLUMBING

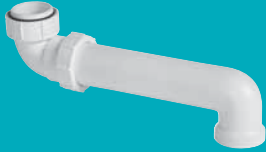

Historically under-sink cupboard space where you need it most has obstructed shelf space with ugly pipework clutter. With Abey Space Savers under-sink cupboard space has been freed up and cupboard space can finally be used for useful storage.

ISOVALVE

IsoValve is a new product that has been invented to make plumbers lives easier, save time and increase productivity. Simply put, IsoValve is a unique isolating service valve and test plug in one. It is installed prior to wall lining so that fixtures can be installed at any time without the time wasting effort of having to turn water off and on at the mains each time – saving labour time and eliminating any inconvenience for other users. Once installed it remains in place and used to directly commission fixtures with the water on. Once connected the isolation valve is simply engaged using an allen key or small isodome.

Install as you would a test plug.

Plan your unit installation with regard to finished wall thickness.

When ready to fit appliance / fixture remove protective cardboard cover and slide over flange.

Connect appliance and commission.

Install Iso-Filter and/or Iso-Adaptor if required.

Firmly hand tighten the IsoNipple and secure the O-ring seal with a spanner.

See instructional web video – www.abeytrade.com.au

RANGEHOOD FLUEING KITS & FLUEING PRODUCTS

Hygiene – In many homes kitchen rangehood exhausts are simply vented into the roof cavity. Over time, cooking gasses and oils expelled from a typical rangehood will build up on the surfaces inside the roof creating an unhygienic and unpleasant environment. Abey's Rangehood Flue Kits expel the cooking gasses and odours outside the house.

Fire Safety – The build up of grease and grime over years of cooking has the potential of being a fire hazard with the potential of fire spreading from an ignited cooking pan racing up the greasy rangehood igniting the built up grime. In situations where inferior plastic conduit may have been used, the plastic, if ignited will actually support combustion. Abey's Rangehood Flue Kits are of metal construction and will not support combustion.

Easy Installation – Abey Rangehood Kits contain all components necessary for easy installation. Available in all inclusive kit forms to suit most applications (vertical kits for metal & tile roofs and a horizontal kit for finishing on an external wall)

Vertical Kit Contents

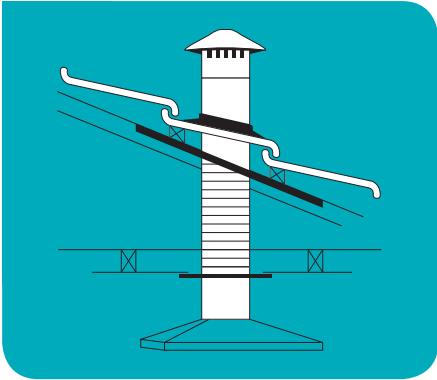

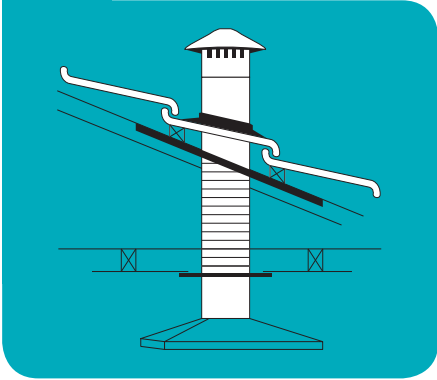

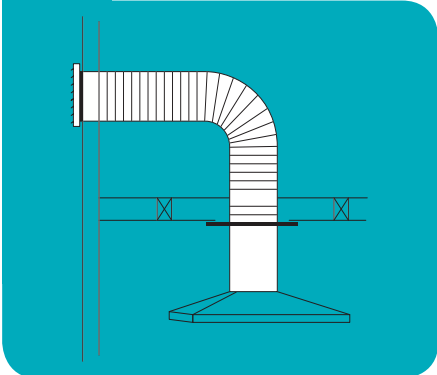

- ✓ 3.4 metres of Airflex + pipe
- ✓ Cowl
- ✓ Roof flashing
- ✓ Ceiling ring
- ✓ Angle support struts (2)

Horizontal Kit Contents

- ✓ 3.4 metres of Airflex
- ✓ External wall vent (Auto Close)
- ✓ Ceiling ring

ROOF PLUMBING PRODUCTS

ABEY ROOFTITE PIPE FLASHING

Abey's Rooftite pipe flashings are available in EDPM and Silicon for high temperature applications up to 200°C, for pipes sizes up to 375mm. This unique solution has been designed with a patented oval base mirroring the hole cut. The design covers a larger range of pipe size with only a handful of units needing to be carried.

Moulded Base Ribs – Provides easier deformation and excellent sealing.

Patented Oval Base – Mirrors hole cut, especially valuable in steep pitched roofs.

Twin Pleats – More flexibility reduced stress especially for steep roofs.

Reduced Flashing width – Allows for better water flow.

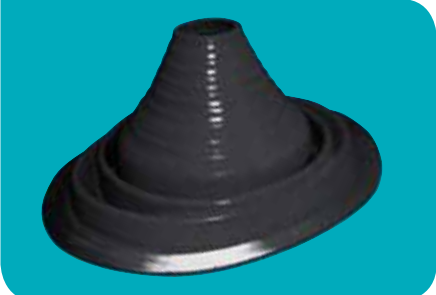

Better Sizing – Each flashing accommodates a greater range of pipe diametres. EDPM & Silicon – Available in standard & hi temperature silicon 200oC.

Moulded O Rings – Internally moulded provides greater strength and seal around pipe.

POSSOFF

Possums, birds & other vermin can be destructive when they get into your roof. Bird nests can even be a fire hazzard. But you can stop these pests with Abey's PossOff.

With guttering removed, you can see the potential entry point.

Simply by installing Abey's PossOff, entry points are protected.
