

ABEY 'SPEED TRAPS' ALL-IN-ONE S&P AAV TRAP

Eliminates unnecessary fabrication work

SP40AV - 40mm trap

SP50AV - 50mm trap

C10AV - Bottle trap

Abey Australia manufacture and source the best of breed plumbing products the world has to offer. Their range of Fantastic Plastic plumbing products provide plumbers superior quality plumbing solutions to save them time, space and money. Abey's all-in-one Speed Traps feature an integrated air admittance valve (AAV) that neutralises syphonic pressure enabling internal, under sink waste installations without the fabrication of costly and unsightly ventilation pipes.

INTEGRATED AAV S&P TRAP ALL-IN-ONE SYSTEM

Abey's new S&P Speed Trap will save you time and money. By drawing air through the integrated AAV valve, the system neutralises syphonic pressure before it reaches the seal of the trap. Therefore, it provides the equivalent of a ventilated system without the installation of costly and unsightly ventilation pipes.

- | Prevents the release of foul air
- | Reduces risk of syphoning
- | Can be used in most internal situations
- | Allows for greater design flexibility
- | Used in both new and existing systems
- | For single fixture only

The unique design draws air through the valve and not through the water seal eliminating gurgling for a quieter discharge. Integrated AAV vents internally and eliminates the need for secondary ventilation and additional pipe fabrication.

S&P Speed Trap fittings for 40 and 50mm pipes - allows for greater flexibility in plumbing design.

Adjustable fittings provide easy adjustability and watertight results.

Extended universal dishwasher inlet with 25mm BSP thread for easier fitting of outlet hose.

Easy fit removable plug for faster installation of dishwasher.

THE HARD WAY

Old style waste trap installations require ugly, expensive, time consuming fabrication of external vent pipes.

CONVENTIONAL WAY

To eliminate external ventilation, an AAV can be incorporated but takes up time and valuable cupboard space.

THE EASY WAY

Abey's 'Speed Trap' with AAV solves the problem. Saves time, saves space, saves unnecessary fabrication.
