SPACE SAVER TRAPPED GULLIES ALL-IN-ONE KIT

Abey's comprehensive range of McAlpine trapped shower gullies are suitable for fitting on concrete and suspended timber floors finished with sheet flooring, tiles or stone. Ideal for installation where floor depth is restricted for showers in homes, hospitals, hotels, retirement homes, sports and leisure facilities etc. Another great feature of the Space Saver Trapped Gully is its removable wedding ring & rubbish catcher. Clogged shower wastes are a thing of the past and precious jewellery will never again get lost down the drain hole. Simply remove the grate, pull out the catcher cup and voila.

Assembly & features for sheet flooring

Plates with securing screws

Cover plate and dip tube assembly. Choice of cover plate finishes available

Removable wedding ring & rubbish catcher

Temporary cover plate. For use during installation as a plug for preliminary air test. Will protect gully from damage by foot traffic and prevent site debris entering the drainage system during installation

Clamp ring with 4 x M6 stainless steel screws

Gully body with solvent welded horizontal outlet

Assembly & features for tiled or stone flooring

Choice of tiles and gratings with or without securing screws

Removable dip tube

Removable wedding ring & rubbish catcher

Dust cap/extension ring. For use during installation to prevent site debris entering the drainage system. The fitting can also be used for raising the height of the tile

Clamp ring for waterproofing membrane and solvent welding tile. The clamp ring has weep holes to allow any moisture at this level to discharge back into the gully and is secured by 4 x M6 stainless steel screws

Gully body with horizontal outlet

Flow Rates: McAlpine gullies can achieve a flow rate of 48 litres per minute depending upon cover plate used.

Pre-Installation: Two-piece gullies enables them to be plumbed prior to installation of timber floors and floor formers.

Easy Cleaning: All gullies have top access for easy cleaning.
