

SAVE SPACE IN YOUR BATHROOM

Horizontal Waterless Trap

Abey's new Space Saver Horizontal Waterless Trap has been designed for bathroom basins to give you back your valuable vanity space. It can also be used on baths for tight installations. Bulky ugly waste traps are a thing of the past.

Overall height 62mm

1½" BSP female inlet nut x 1½" universal compression outlet.

Designed to allow full use of storage space below the basin within the cabinet or furniture.

Membrane water seal will never dry out as it is a sealed appliance.

Internal membrane opens under water pressure to allow discharge to flow freely and then closes to form a seal to prevent foul gasses entering.

Easy to clean. Simply remove the split pin at the front of the valve, take out the plug and membrane and clean in hot soapy water and reassemble.

The valve allows air to be drawn into the discharge waste pipe when negative pressures occur and eliminates the need for secondary ventilation to the discharge pipework. This allows for greater flexibility in the plumbing design.
